

Khine Zar Hein

West Covina, CA | (310) 736-5291 | khinezarhein1@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

California State Polytechnic University, Pomona

August 2025 — Present

B.S. in Computer Science | Data Science minor | Expected Dec 2027 | GPA: 3.72

Los Angeles City College Associate Degree | GPA: 3.7 | Transferred with Honors

Feb 2024 — June 2025

CodePath — Advanced Technical Interview Prep

Feb 2026 — April 2026

EXPERIENCE

BurmaLingo — Founder & Full-Stack Developer

April 2026 — Present

React, TypeScript, Tailwind CSS, FastAPI, PostgreSQL, MVC, JWT, OpenAI API, GitHub Actions | [GitHub](#) | [Live](#)

- Built and launched a 6-level English learning web app for Burmese speakers with GPT-4o IELTS band scoring, SM-2 spaced repetition algorithm from scratch, and Stripe subscription billing with webhook-based tier control
- Architected full-stack system: React/TypeScript + FastAPI + PostgreSQL deployed across Vercel, Railway, and Neon with GitHub Actions CI/CD

Research Assistant — Dr. Ben Steichen's HCI Lab, Cal Poly Pomona & Santa Clara University

June 2026 — Present

- Porting a cross-platform Flutter math-language learning app to a React/Next.js + Firebase web stack, preserving all 5 game types and 3 language-assist levels (full and on-demand translation, hover-word glossary, and text-to-speech) used with bilingual K-5 learners.
- Contributing to an HCI research project on AI-driven, personalized multilingual math-language learning, grounded in IRB-approved pilot studies in California classroom and tutoring settings.

CodePath — Tech Fellow

May 2026 — Present

- Provide technical support and mentorship to students in CodePath's Applied AI course
-

OPEN SOURCE

Submittly — Open Source Contributor

March 2026 — June 2026

- Contributed 4 pull requests across grading, privacy, and access control systems to a production university platform used by thousands of students and instructors across multiple universities
 - Wrote Cypress E2E tests validating privacy protections and grading workflows across student, TA, and instructor roles; fixed a PHP bug in SubmissionController.php causing silent merge failures in bulk upload conflict detection
 - Debugged CI failures, resolved flaky tests, and addressed reviewer feedback across 3+ review cycles
-

PROJECTS

Inventra — Full-Stack Inventory & Sales Management Platform

Python, FastAPI, PostgreSQL, React, TypeScript, JWT, Resend, APScheduler, pytest, GitHub Actions | [GitHub](#) | [LiveDemo](#)

- Built production REST API with JWT auth, automatic stock deduction, server-side negative stock guard, and Resend API email receipts after every transaction; APScheduler sends daily low-stock alerts automatically
- Designed analytics endpoint aggregating revenue, cost, and profit; built React/TypeScript dashboard with Recharts visualizing stock levels and profit trends over time

MLH Production Engineering Hackathon — Flask REST API

Python, Flask, PostgreSQL, Redis, Nginx, Docker, Locust, pytest, GitHub Actions | [GitHub](#)

- Redis caching + Nginx load balancing across 2 Gunicorn containers — sustained 500 concurrent users at 76 RPS with 0 failures; 83% pytest coverage (19 tests), structured JSON logging, Discord alerting, GitHub Actions CI/CD
-

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, PHP, HTML, CSS

Backend & Infra: FastAPI, Flask, Express.js, Node.js, PostgreSQL, Redis, Nginx, Docker, APScheduler, Resend API, SQLAlchemy

Frontend & Tools: React, Next.js, TypeScript, Tailwind CSS, Vite, Recharts, Git, Cypress, Vagrant, Linux/Unix

Core Skills: Full-Stack Development, MVC Architecture, LLM Integration, CI/CD, Data Structures & Algorithms
