Khine Zar Hein

West Covina, CA | (310) 736-5291 | khinezarhein1@gmail.com | LinkedIn | GitHub | Portfolio

EDUCATION

California State Polytechnic University, Pomona August 2025 — Present
B.S. in Computer Science | Data Science minor | Expected Dec 2027 | GPA: 3.72

Los Angeles City College Associate Degree | GPA: 3.7 | Transferred with Honors Feb 2024 — June 2025

CodePath — Advanced Technical Interview Prep Feb 2026 — April 2026

EXPERIENCE

Software Engineering Research Assistant — Cal Poly Pomona August 2026 — Present

- Own the language-assessment side of an eye-tracking platform testing whether gaze data can infer language proficiency; configured and validated the calibration-to-heatmap pipeline (ST-DBSCAN fixation clustering)
- Migrated gaze-data storage from SQLite to PostgreSQL, adding per-session user tracking and batched writes; building a 100-question participant test interface (20 with audio) for a language-proficiency user study

Website Intern — Yang Management *(placed at LACCD)* July 2026 — Present

- Led a document-ownership audit across 9 LACCD campuses (LAHC, LAMC, LASC, LATTC, LAPC, LAVC, WLAC, ELAC, LACC), correcting file URLs/types and flagging unowned CMS content to support a district-wide accessibility initiative
- Picked up Drupal, YAML, Twig, and SASS/SCSS for the College CMS platform, coordinating deliverables across IT, CS, and Web Services teams via Microsoft Teams and Planner

Founder & Full-Stack Developer — BurmaLingo April 2026 — Present

React, TypeScript, Tailwind, FastAPI, PostgreSQL, JWT, OpenAI API, Azure AI Speech, Stripe | GitHub | Live

- Architected and launched a 6-level English-learning platform for Burmese speakers on React/TS + FastAPI + PostgreSQL with CI/CD, now serving paying subscribers
- Built GPT-4o-powered IELTS scoring, Azure AI Speech pronunciation feedback, SM-2 spaced repetition, Stripe billing E2E

Software Engineering Intern — Santa Clara University June 2026 — August 2026

- Ported a Flutter math app to React/Next.js + Firebase and redesigned it into a 5-level, 137-question progression system with real-time tracking, a rebuilt theme-customizable UI, and 3 tiered language-assist levels for bilingual K-5 learners
- Built a Firestore analytics pipeline and teacher dashboard, backed by 62 unit tests at 100% coverage

Tech Fellow — CodePath May 2026 — August 2026

- Mentored ~200 students in CodePath's Applied AI course — completed each of the 9 weekly Python projects in advance to anticipate blockers, then supported breakout-room Q&A during live sessions to unblock students in real time

Open Source Contributor — Submitty (Rensselaer Polytechnic Institute) March 2026 — June 2026

- Merged 3 PRs to Submitty, a production grading platform serving thousands of students and instructors — added Cypress E2E coverage for grade-banner overrides and legal-name privacy protections across roles, and fixed a PHP bug in bulk-upload conflict detection causing silent merge failures

PROJECTS

Inventra — Full-Stack Inventory & Sales Management Platform

Python, FastAPI, PostgreSQL, React, TypeScript, JWT, Resend, APScheduler, pytest, GitHub Actions | GitHub | Live

- Built production REST API with JWT auth, automatic stock deduction, server-side negative stock guard, and Resend API email receipts after every transaction; APScheduler sends daily low-stock alerts automatically, and designed an analytics endpoint aggregating revenue, cost, and profit with a React/TypeScript dashboard visualizing stock levels and profit trends over time

MLH Production Engineering Hackathon — Flask REST API

Python, Flask, PostgreSQL, Redis, Nginx, Docker, Locust, pytest, GitHub Actions | GitHub

- Redis caching + Nginx load balancing across 2 Gunicorn containers — sustained 500 concurrent users at 76 RPS with 0 failures; 83% pytest coverage (19 tests), structured JSON logging, Discord alerting, GitHub Actions CI/CD

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, PHP, HTML, CSS

Backend & Infra: FastAPI, Flask, Express.js, Node.js, PostgreSQL, Redis, Nginx, Docker, Alembic, Stripe, Azure AI Speech, APScheduler, Resend API, SQLAlchemy

Frontend & Tools: React, Next.js, TypeScript, Tailwind CSS, Vite, Recharts, Git, Cypress, Vagrant, Linux/Unix

Core Skills: Full-Stack Development, MVC Architecture, LLM Integration, CI/CD, Data Structures & Algorithms
